EDUCATION

Bahir Dar Institute of Technology, Bahir Dar University

B.Sc. in Software Engineering (CGPA: 3.66/4.00, National Exit Exam: 71.25%)

Bahir Dar, Ethiopia

Graduation: June 2026

TECHNICAL SKILLS & SPOKEN LANGUAGES

Languages: JavaScript (ES6+), TypeScript, Java, Dart, C++, HTML5, CSS3

Frontend & Mobile: React.js, Vite, Tailwind CSS, Flutter, Responsive Design, State Management

Backend & Databases: Node.js, Express.js, PostgreSQL, MongoDB, MySQL, Prisma ORM, RESTful APIs, JWT, Zod, Socket.IO

Developer Tools: Git, GitHub, Docker, Postman, VS Code, Vercel, Render, Firebase, npm

Spoken Languages: Amharic (Native), English (Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern

Amhara Innovation and Technology Bureau

Mar 2025 – May 2025

Bahir Dar, Ethiopia

- Engineered a web-based Task Management System using React.js, Node.js, Express, and MongoDB, digitizing administrative operations and eliminating manual paper workflows across regional departments.
- Architected secure RESTful APIs integrated with role-based access control (RBAC), streamlining cross-department task assignments and notifications.
- Constructed optimized MongoDB aggregation pipelines and indexing schemes, reducing record query response times.
- Conducted comprehensive unit testing and performance optimization, ensuring low-latency request handling under peak internal usage.

FEATURED PROJECTS

QR Menu SaaS | React, TypeScript, Vite, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS

[\[Live Website\]](#)

- Architected and deployed a multi-tenant production SaaS platform enabling restaurants and hospitality venues to publish bilingual (English/Amharic) menus accessible via QR code with zero app installation.
- Engineered a merchant dashboard managing real-time menu cataloging, dish availability, and multi-tier pricing with immediate live-sync to the public customer view.
- Implemented dietary filtering (fasting/non-fasting), instant search, and integrated mobile payment/Wi-Fi info widgets.

Enterprise Pharmacy Management System | React.js, Node.js, Express, MongoDB, Socket.IO, Tailwind CSS

[\[GitHub\]](#)

- Developed an end-to-end pharmacy inventory and supply distribution system featuring strict role-based authentication tailored for EPSA Officers, Store Pharmacists, and Dispensers.
- Constructed FEFO (First-Expired, First-Out) stock tracking, automated shipment processing, and Excel bulk data import/export.
- Engineered real-time notification microservices with Socket.IO for automated low-stock warnings and batch recalls.

MOHAS Tech Coaching Mobile Application | Flutter, Dart, Node.js, MySQL, Socket.IO

[\[GitHub\]](#)

- Collaborated in a team environment to engineer a cross-platform coaching app, building the coach dashboard, session tracking, and interactive maps.
- Designed and implemented the Evidence Management module supporting multi-format (PDF/image) uploads with real-time cloud synchronization.
- Integrated Node.js backend services, role-based access control, and reporting tools with Excel/CSV export capabilities.

CERTIFICATIONS & HACKATHONS

MOHAS Tech Mobile Development Hackathon | Collaborative Flutter & Node.js Solutions

Feb 2026 – Mar 2026

Full-Stack Development Certification | Minab Tech (Comprehensive MERN Stack Architecture)

2024

Content Creation & Digital Communication | Amhara Labour & Skill Bureau

2026
